

To connect your Retail Express Point of Sale (POS) system to your WooCommerce system you need TranslatorHQ. This service will dramatically reduce both time and money required to run your online systems.

Once products are in Retail Express our application will:

- Update pricing and stock levels regularly throughout the day
(checked every 15 minutes)
- Create new and update products every hour
- Receive orders automatically into Retail Express

This allows you to carry on running your business from Retail Express whilst **WooCommerce is automatically updated as one seamless system.**

What Fields are Synchronised

Retail Express and your WooCommerce system both offer fields with specific attributes about your products. For example, "Description" in Retail Express will be equivalent to the field "Title" in your WooCommerce site. We offer a configurable solution to meet your specific needs.

This table is called the **Datamap**. It shows fields and how they relate between Retail Express and WooCommerce.

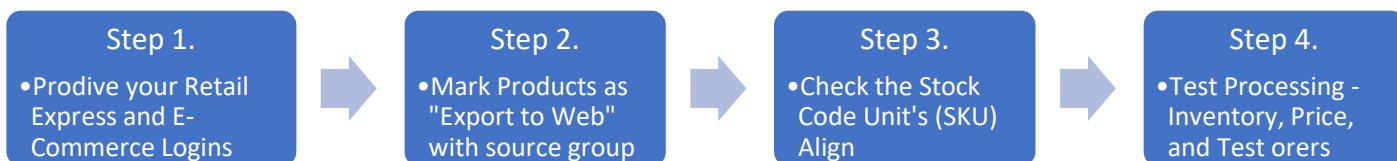

Discount and Price Hierarchy

Prices are managed through a hierarchy that allows a comparison between a "Compare at Price" or RRP and a number of discount options explained in [further detail here](#).

Then before selling you include:

- Uploading Images
- Adding Detailed Descriptions
- Finalising Collections
- Publish your Product!

What we Require from You

Providing we receive the relevant information promptly, you can be up and running from 4 days

Your Project

A new eCommerce system can be a daunting prospect, luckily this is all we do and we are good at it. Our proven project methodology is supported by our custom management and helpdesk software to ensure the fastest and most reliable return on your investment.

Other Services and Products

TranslatorHQ provide other integrations such as from Retail Express to Mailchimp to support all your customers. We offer links to CRM and other applications such as Salesforce, Zendesk, Freshdesk to provide an overview of your customers. We also have a special migration assistance, liquid changes, metafield functionality, and custom programming.

Pricing

TranslatorHQ provide the Translator application for a cost of \$1,750 (+ GST) this investment covers the basic implementation of the application into your system and the labour as a fixed price delivery controls your costs. For a low hosting charge per month we support and evolve your integration through new products, campaigns and plans.
